

Logan Bell Housing PTO's For Runway Cleaning / Airport and Roadway Marking Removal Equipment

Waterblasting truck equipped with 375 HP Diesel Engine and an air / fluid actuated Logan LC-314 Bell Housing PTO for smooth engagement.

Water blasting trucks quickly and completely remove all types of durable traffic markings from asphalt and concrete applications on roadways, airports, parking lots, with up to 40,000 psi. (2700 bar) of water pressure. The simultaneous jetting and vacuuming of the remnant material, minimizes damage to surfaces and eliminates secondary clean-up. Logan flywheel mounted, hydraulically actuated, Bell Housing PTO clutches are an ideal option, and available in No. 00 – No. 5 size flywheel; fitting engines with HP ranges from 50 – 1000 HP. Self-adjusting, smooth engagement and disengagement, as well as remote activation, make the Bell Housing PTO ideal for diesel and spark ignited engines for mobile applications.

Medium Duty surface preparation truck equipped with Logan LC-211 Bell Housing PTO powered by a 200 HP Diesel engine.

Heavy duty airport marking removal truck equipped with a Logan LC-311 Bell Housing PTO, with SAE No. 3 flywheel mount, powered by a 240 HP diesel engine.
